

**VICE PRESIDENT PROF.
HASAN DWEIK AL QUDS
UNIVERSITY IN JERUSALEM**

Dear Friends,

This letter is written in support of our friend professor massimo canava who devoted all his life on working on spreading peace and solidarity all over the world and in particular in places where conflict resulted in the death and destruction of large number of people like cosovo lebanon and israel-palestine conflict. His intellectual work on a very high international level and in particular on university cooperation where he put a great effort on university role as centers of change in creating a world where peace can prevail. Students who are the future leaders of this world are an important sector of our community.

I myself was involved in many workshops and activities organized by massimo canava and focused on the role of students in future world peace. I think we all need to give him all the support he needs to continue his active role in having a better future for all people and his critical role in making people think of humans no matter their religious or political or nationality and we all must look at people as humans.

So I strongly believe to give professor massimo canava all the needed support to continue with his efforts and mission of making a better world in the future and preserve the various civilizations.
